Exam Session - Knowledge Check: AZ-900 Exam Prep

#1

Microsoft provides Azure _____ services that are in physically isolated data centers and networks, but in order to use these services, your organization has to meet eligibility requirements.

✕

Lockdown

✓

Government

✕

Secure

✕

Classified

Explanation

If you're involved in cloud solutions for the U.S. government, then be aware that Microsoft provides Azure Government services that are in physically isolated data centers and networks. Azure Government is available to U.S. government agencies at the federal, state, and local levels, as well as to their partners. To use these services, your organization has to meet eligibility requirements.

#4

Which of the following statements about resource groups and tags in Microsoft Azure is false?

✓

When you delete a resource group, all of the resources in it remain.

✕

If you want to apply a tag to all of the resources in a resource group, you'll have to apply it to them individually.

✕

You can apply tags to a resource group.

✕

One common use is to apply organizational tags, such as "Engineering" and "Marketing," to resources; that way, you can easily figure out how much to charge each department for their resource usage.

Explanation

Tags are simply labels that you can apply to resources for management purposes. One common use is to apply organizational tags, such as "Engineering" and "Marketing," to resources. That way, you can easily figure out how much to charge each department for their resource usage. You can apply tags to a resource group, but bear in mind that those tags do not get inherited by the resources in that resource group. So if you want to apply a tag to all of the resources in a resource group, you'll have to apply it to them individually. When you delete a resource group, all of the resources in it get deleted, too.
